

SOCIO-CULTURAL ANALYSIS: COURSE cum WORKSHOP

This Course cum Workshop is being envisaged and organized on the basis of **Analysis, Awareness and Action** pedagogy to take a critical stock of the prevailing situations in the fields of social, economic, political and religious situations in our country. Keeping this objective in view, a few relevant themes have been worked out for the workshop. The very Sovereign, Socialist, Secular, Democratic and Republic nature of our country is at stake since the uprising of communal forces. The preamble of our Constitution which guarantees **Justice** (of social, economic and political), **Liberty** (of thought, expression, belief, faith, and worship), **Equality** (of status and opportunity) and **Fraternity** (of the dignity of the individuals and the unity and integrity of the nation) is becoming a distant dream for the ordinary people of our country.

An integrated view of the situations is desired to be achieved through this workshop. Socio-economic, religio-political and gender contexts with alternative discourses and media will form the content of this workshop. Social scientists and activists will conduct this course through appropriate field visits and reflections. This course is intended to develop a critical and constructive outlook on Indian society, which will be of immense help to positively contribute to the progress of this nation.
